MeeSign platform

A threshold cryptography workshop

Come and get hands-on experience with threshold cryptography in a workshop by PhD students from Masaryk University, Brno, Czechia. During the workshop, we will cover the concept of threshold cryptography and how it can improve security in existing cryptographic systems. Using a threshold cryptography demonstration platform, we will showcase several exciting usage scenarios in hands-on activities, accompanied by follow-up discussions. Bring your smartphone (Android) or laptop (Linux, Windows, experimental support for MacOS) for the hands-on experience.
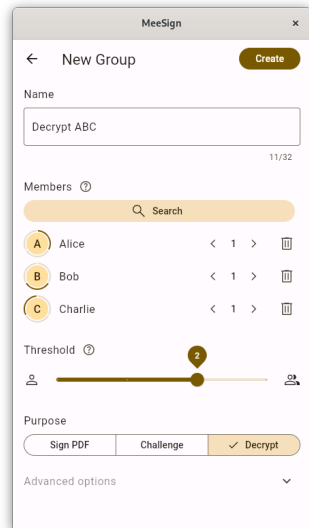

When: 23/05/2024 (14:15–17:45)
Where: Room 1008, Delta Research Center, University of Tartu
Who: RNDr. Antonín Dufka
Mgr. Jan Kvapil
